MATRIARCH

Is known as the dominant older female that leads the herd.

HERBIVORES

Their diet primarily consists of grasses, fruits, leaves and bark.

STRONG

They are known for their impressive strength in being able to lift and carry heavy objects.

TUSKS

These can be found on both males and females. However, they are more prominent and generally larger in males.

COMMUNICATION

They use low-frequency sound waves for communication between members of the herd and outside of the herd. These sounds can carry for distances up to 10 miles.

ASIA

The largest continent on earth and where Asian Elephants can be found.

GESTATION

They have one of the longest gestation periods among mammals. Babies develop 18 to 22 months.

CALF

A baby Asian elephant is called a calf and are cared for by their mother and the rest of the herd.

WATER

Asian elephants depend on water, often found near large sources. They consume 30 to 50 gallons daily.

ENDANGERED

Endangered due to habitat loss and ivory poaching, these elephants confront multiple survival threats.
